

CHIDOZIE ELVIS OKAFOR

Roxbury, MA 02119 | (774) 297-8644 | okafor.elvis@outlook.com | linkedin.com/in/chidozie-e-okafor | ceokafor.com

PROFESSIONAL SUMMARY

AI Engineer, Software Developer, Product Manager, and UI/UX Designer who ships end to end — from user research and interface design through Flutter and Supabase implementation, OpenAI API integration, and release. Sole developer of a multilingual prenatal health platform delivering culturally personalized guidance across 8 languages, owning the roadmap, the data model, the design system, and the code. Combines a Master of Architecture's systems and spatial training with hands-on engineering: Flutter, Dart, Supabase, PostgreSQL, REST and OpenAI APIs, Git-based workflows, and AI-assisted development in Cursor and GitHub Copilot. Equally comfortable writing the user story, drawing the screen, and merging the pull request.

CORE COMPETENCIES

- AI Engineering | LLM Integration | OpenAI API | Prompt Engineering | Retrieval Patterns
- Mobile + Web Development | Flutter | Dart | React | TypeScript | REST APIs
- Backend + Data | Supabase | PostgreSQL | Auth + Row-Level Security | Firebase
- Product Management | Roadmapping | User Stories | Backlog + Sprint Planning | Linear
- UI/UX Design | Figma | Design Systems | Wireframing | Prototyping | Accessibility
- User Research | Journey Mapping | Usability Testing | Localization (8 Languages)
- Engineering Practice | Git + GitHub | Code Review | Testing | Version Control
- AI-Assisted Development | Cursor | GitHub Copilot | Claude | Agentic Workflows
- Cross-Functional Collaboration | Stakeholder Communication | Technical Writing

PROFESSIONAL EXPERIENCE

AI Engineer + Software Developer *Independent* — Roxbury, MA | 2024 – Present.

Design, build, and operate a fully integrated AI-powered operating system managing 8 concurrent active ventures across 6 industries simultaneously. This is not theoretical AI usage — it is applied AI orchestration at a level most organizations have not yet reached internally.

- Architected a multi-layer productivity command center using Notion as the master workspace, integrating 15+ AI and automation tools into a single cohesive system: task management, calendar automation, CRM, financial tracking, sprint planning, social scheduling, and development workflows all interconnected and automated

- Engineered a full AI tool stack combining large language models (Claude, ChatGPT), code intelligence (Cursor, GitHub Copilot), automation (Zapier, Make), scheduling intelligence (Reclaim.ai), and domain-specific tools (HubSpot CRM, Buffer, Linear, Supabase) — each tool assigned a specific role within the ecosystem
- Developed custom Notion AI Skills (saved prompt library) enabling one-command execution of recurring complex tasks including production scheduling, corporate pitch writing, CV optimization, sprint planning, competitive research, and curriculum development
- Designed and maintained interactive project dashboards including live Gantt charts, Kanban boards, relational databases, and automated reminder systems linked to Google Calendar and Gmail
- Built automated workflows eliminating manual repetitive tasks: new task → auto-calendar entry, new order → auto-invoice trigger, new social content → auto-scheduled publish
- Apply prompt engineering principles daily across all AI tools — writing precise, context-rich instructions that consistently produce professional-grade outputs in architecture, business development, code, healthcare, marketing, legal documents, and curriculum design

Founder + Full-Stack Developer — Health Tech Platform (Trimacare) — Roxbury, MA | 2026 – Present

Building the world's premier pregnancy lifestyle platform as a solo developer, using AI-assisted development tools to accelerate a 12-month roadmap to working MVP.

- Use Cursor (AI-powered code editor) and GitHub Copilot to accelerate solo development of a Flutter + Supabase + OpenAI API mobile application
- Manage all sprint planning and backlog in Linear with GitHub integration; maintain development velocity on a 3–4 hour/week budget using AI-assisted code generation and debugging
- Design multilingual AI content recommendation system using OpenAI API to deliver culturally personalized prenatal care guidance across 8 languages
- Apply AI tools for all product documentation, feature specification writing, user story development, competitive research, and go-to-market planning

Digital Operations + Automation Lead *Red Remedy + Custom Archetype + All Seasons Crew* — Roxbury, MA | 2024 – Present

Deployed AI and automation tools across three concurrent business operations to eliminate manual bottlenecks and create scalable, repeatable systems.

- Red Remedy: Automated social media scheduling via Buffer (2x/week posting cadence); built HubSpot CRM pipeline for corporate wellness B2B outreach; used Wave for automated invoicing; used ChatGPT for all pitch writing, LOI development, and corporate communications

- Custom Archetype: Integrated Printify POD automation (order → print → ship without manual intervention); built Stripe payment flow; used AI tools for product description writing and SEO optimization
- All Seasons Crew: Built prospect database in HubSpot; created automated follow-up sequences; used AI for all cold outreach scripting and proposal generation
- Used Canva AI + Midjourney for design output across all three brands simultaneously — producing label design, social graphics, pitch decks, and marketing materials faster than any traditional design workflow

Project Manager + Technology Integration Lead *Temple University — Philadelphia, PA | 2023 – 2024*

- Applied digital project management tools to deliver multiple concurrent institutional projects; managed documentation workflows, stakeholder communication, and production schedules across simultaneous engagements

Project	AI Tools Used	Outcome
Master Productivity Command Center	Notion AI, Claude, ChatGPT, Reclaim.ai, Zapier	8-project operating system with live dashboards, auto-scheduling, and integrated reminders
Trimacare App Development	Cursor, GitHub Copilot, Supabase, OpenAI API, Linear	Solo MVP development on 12-month roadmap
Red Remedy Corporate Pitch System	ChatGPT, Canva AI, HubSpot	Pitch decks, LOIs, and CRM pipeline for B2B wellness sales
Resume + Portfolio System	Claude, ChatGPT	14 ATS-optimized industry-specific resumes across 7 industries
Multilingual Curriculum Architecture	Claude, ChatGPT	8-language homeschool curriculum from birth to age 18
Social Media Automation	Buffer, Canva, CapCut	Fully automated 2x/week multi-platform publishing
3D Art Production Pipeline	Bambu Lab P1, AI design tools, Alibaba sourcing	End-to-end physical product line with collector packaging

- Used advanced visualization and rendering software (Rhino 3D, V-Ray, Enscape, Adobe Suite) to translate complex design concepts into clear decision-making materials for non-technical institutional leadership

KEY PROJECTS + SYSTEMS BUILT

ENTREPRENEURIAL VENTURES

Founder + CEO | Red Remedy | 2025 – Present Founder + Developer | Trimacare | 2026 – Present
Founder | Custom Archetype | 2024 – Present Owner | All Seasons Crew | 2024 – Present Creative
Director | Multi-Brand Portfolio | 2023 – Present

EDUCATION

Master of Architecture + Environmental Design | Temple University, Philadelphia, PA | 2019 – 2022
Bachelor of Science — Financial Accounting + Audit Practice | Covenant University, Nigeria | 2012 – 2016
Academic Achievement Award | Temple University

TECHNICAL SKILLS

AI Tools: Backend + Data | Supabase | PostgreSQL | Auth + Row-Level Security | Firebase Automation:
Zapier | Make (Integromat) | Reclaim.ai | Buffer | Linear Development: Flutter | Supabase | OpenAI API
| GitHub | Firebase Design: Figma | Adobe Creative Suite | Canva | Rhino 3D | SketchUp | AutoCAD PM
+ Ops: Notion | HubSpot | Wave | Calendly | Google Suite | Microsoft Office

Languages: English (Fluent) | Igbo (Native)
